MANOMETER PRODUCTS

MODEL G-211  
GAS COMPANY  
MANOMETER  
DATA SHEET

## DESCRIPTION

The Alta-Robbins Model G-211 U-Tube manometer has been designed to provide trouble free service for all gas company uses.

## FEATURES

Each G-211 manometer includes a durable extruded body with integral scale calibrated in inches and tenths. Pressed into each body is a non-breakable U-Tube. The G-211 is available in two standard ranges - 12" & 16".

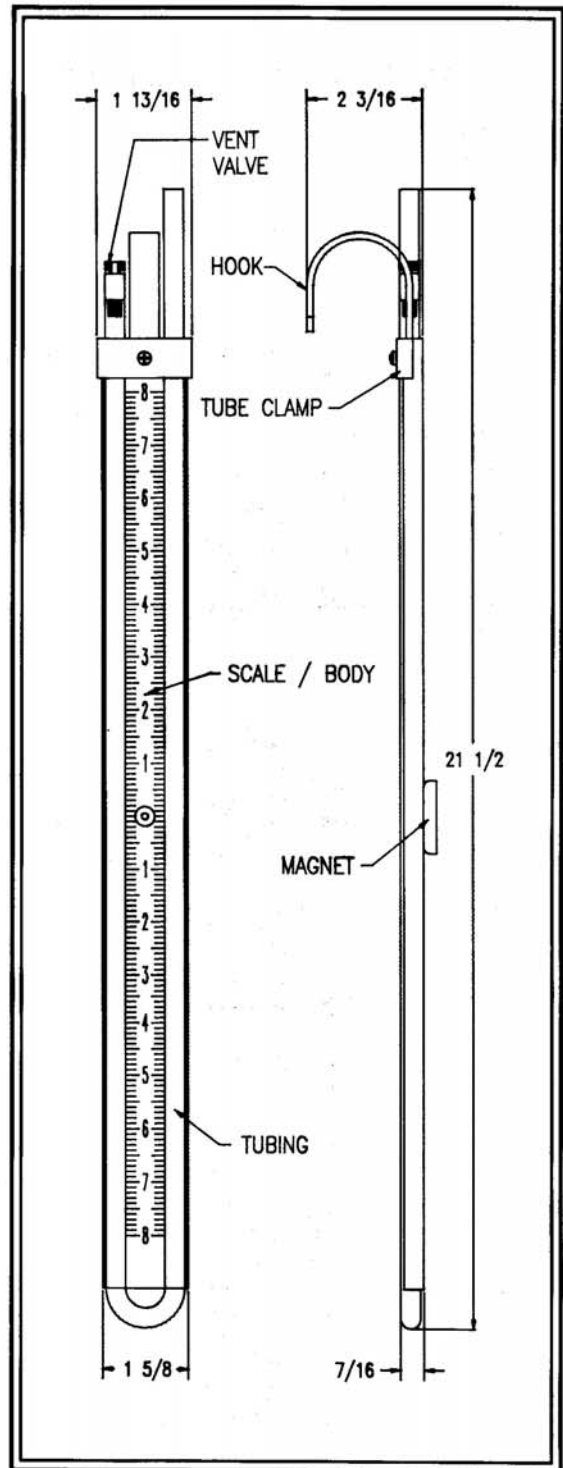

To the basic instrument can be added any of the following options:

- » **MOUNTING HOOK** - Adjustable to four heights facing either forward or backward.
- » **MAGNET** - For mounting to a steel object.
- » **PORT VALVE** - Brass valve can be closed to contain indicating fluid during transport. Valves have been designed to receive neoprene tubing, when opened air or liquid will flow through valve.
- » **TUBE CLAMP** - To ensure the unintentional separation of body and U-Tube.

## ACCESSORIES

- » **NEOPRENE TUBING** - For connecting manometer to pressure source.
- » **G-1000 GREEN CONCENTRATE** - Manometer indicating fluid, Specific Gravity 1.000, green in color.

Start with the basic G-211 U-Tube Manometer and add to it any or all of the above optional features and or accessories. This allows you to customize your instrument for maximum cost efficiency and ease of use.
